Sustainability in Transport Design & Assessing Environmental Impact

AACA Competency Standards related to these sessions:

Explain how a culture of sustainability can be integrated into transport infrastructure projects and identify specific strategies that can be employed to ensure this commitment is maintained throughout the project.

Identify design features that can be included to balance environmental sustainability with the practical needs of a transport hub.

Outline the role that community engagement and stakeholder collaboration play in ensuring that sustainability goals align with the needs and expectations of the local population.

(Competency Codes: PC 16, PC 24, PC 28, PC 31)
